

B&B LAUNCHES SPECIALIST BLOCK CLAMPS AT IMHX

The BlockMaster range ensures optimum performance in brick & block and flag & kerb applications.

The UK's leading supplier of forklift truck attachments and masts, B&B Attachments, is maintaining its reputation for marketing innovative, new products by unveiling BlockMaster, a range of specialist clamps (on Stand 18N30 at IMHX) which have been specifically designed and manufactured by Fielden Handling for the brick, block, flag and kerb markets. The teaming of Fielden Handling's proven reputation for quality and reliability with B&B Attachments unrivalled record for after sales service has already resulted in enormous interest in the BlockMaster range.

Constructed for durability and to withstand the rigors and tough environments of the brick and block industry, the BlockMaster ensures optimum performance and maximum productivity.

Incorporating many unique design features, the BlockMaster builds on B&B Attachments' reputation within the industry for providing its customers with quality products that are supported by qualified, experienced, factory trained engineers. The BlockMaster range includes a series of four different clamps to cater for a wide range of applications.

The BlockMaster G16R is a rotating flag and kerb clamp that has been designed to ensure optimum performance and maximum productivity when handling single packs. Rated at 1600 kg and with an inside height of 600mm, the BlockMaster G16R is ideally suited to yard work and loading. Manufactured to the highest possible specification with every part either painted or zinc plated before construction, the G16R provides outstanding visibility and many new design features.

B&B Attachments E series include a range of pivot type clamps designed for handling one or two brick or block packs. The E20, E30T and E40T are all side shifting pivot arm clamps rated 2000kg, 3000kg and 4000kg respectively. All three clamps offer excellent visibility, hardened steel brushes at pivot points, high-density nylon wear bushes and chrome cylinder. In addition they have profiled slim line arms made from high tensile steel plate and are easily accessed for improved serviceability and general maintenance.

To complete its BlockMaster range, B&B Attachments has introduced the H Series, a range of parallel action clamps for double packs of flags and kerbs with capacities up to 3200kg and the BC Series, a range of pivot type clamps with rotating options for handling either one or two brick or block packs. The BC Series is designed to handle capacities up to 4000kg.

All clamps are supported by B&B Attachments' UK network of qualified service engineers and a large spare parts stockholding. The new BlockMaster range will widely welcomed by builder's merchants, building, construction and brick and block manufacturing industries.

As well as launching its BlockMaster range, B&B Attachments will also be exhibiting its full range of products which include carton clamps, rotators, working platforms, push pull devices, fork positioners, sideshifters, weighing devices, masts.
